- Vite, ESLint, GitHub Actions
- Cypress / Vitest
- Responsive UI, Animations
  UX, Accessibility

LANGUAGES

- Spanish: Native
- Catalan: Native
- English: Fluent – Professional Use

PROFILE

Frontend developer with experience in React, TypeScript, and modern animations. Since December 2022, I've been designing web interfaces for dashboards, interactive microsites, and visual platforms — combining modern technology with a strong focus on user experience. I specialize in building fast, polished, and production-ready user interfaces — without unnecessary meetings or delays.

EXPERIENCE

Freelancer   2022 - PRESENT
Frontend Developer

- Design and development of modern, responsive interfaces for digital products.
- Implementation of dashboards, interactive systems, and animated transitions.
- Advanced use of Zustand, Framer Motion, React Hook Form, Chart.js, and Zod validation.

Key Projects

- NovaTech Solutions – Multipage SaaS platform with animated UI, advanced forms, testing, and blog.
- NebulaOS – Futuristic microsite with a custom animated console and OS-style design.
- TrackForge – Interactive dashboard with persistent logic, charts, and task system.
- Visionary Gallery – Digital art SPA with real-time filters and a persistent favorites system.

EDUCATION

Bootcamp Fullstack Engineer   2023 – 2024
Academia X

Higher National Diploma – Computing   2022 – 2024
CEV | Madrid

SERVICES

- Animated Landing Pages (React + Tailwind)
- Dashboards with filters & state logic
- Product UI components
- Visual SPAs with modern transitions
